

## Regarding Publication of SECOM Report 2022

Five years have passed since we launched the ANSHIN Platform service infrastructure, designed to help realize the SECOM Group's Vision for 2030, through which we strive to provide services that deliver seamless peace of mind for anyone and everyone whenever and wherever necessary. In that time, society has undergone fundamental changes brought about by a variety of factors, including technological advances, a declining labor force and the COVID-19 pandemic. With safety and peace of mind increasing essential concerns to today's society, the role of this infrastructure is taking on increasing importance.

At SECOM, we have always sought to create pioneering services that benefit society as a whole. This report introduces some of our efforts to maximize corporate value, as well as to decisively nurture pillars of future growth. We are also conscious of the importance of conveying how materiality, ESG, and other initiatives aimed at helping ensure sustainability will also enhance our competitiveness. We also work closely with relevant departments to create a report that reflects the views of the entire SECOM Group.

Guidelines referenced in the preparation of this report include the Value Creation Foundation (VRF)'s International Integrated Reporting Framework and the Guidance for Collaborative Value Creation, put out by the Ministry of Economy, Trade and Industry (METI).

Looking ahead, we will continue to devote our best efforts to creating an effective communications tool that helps promote constructive dialog with stakeholders. To this end, we would be grateful to hear the frank opinions of all readers.
