PROFILE

Since its establishment in 1962, SECOM CO., LTD., a pioneer in Japan's security services industry, has sought to contribute to society through its business activities. In 1966, SECOM developed Japan's first on-line security system, which it soon began providing to businesses. In 1981, SECOM developed and marketed a home security system, while two decades later it began offering security systems that protect people and property, including vehicles, on the move. These efforts have enabled SECOM to respond to society's increasing and evolving security needs, as well as to achieve steady growth.

Today, SECOM—comprising the parent company and the companies of the SECOM Group—has expanded its focus beyond its core security services to include fire protection services, medical services, insurance services, geographic information services, real estate development and sales, and information and communication related and other services.

In line with its overarching goal of providing safety and security for people whenever and wherever necessary, SECOM continues to work toward realizing its vision for the future—the Social System Industry—a framework of distinctive products and services that make life more secure, convenient and comfortable. Through these efforts, SECOM continues to target further growth.

SECOM has also expanded into overseas markets, establishing a network of subsidiaries and affiliates in 11 countries and territories, where it provides services of the same high quality as it does in Japan. In particular, SECOM is focusing on the high-growth markets of the People's Republic of China (PRC) and Southeast Asia, and is broadening its presence in both areas to respond to rising demand for security services.
