Secom Industries completes new headquarters plant

Subsidiary Secom Industries Co., Ltd., which designs and manufactures security equipment, completed construction of a new headquarters plant, thereby expanding its production area. The new plant boasts

advanced testing areas, crucial to enhancing the quality of security systems, thus reinforcing Secom Industries' role as our principal manufacturing base.

December 2012

Autonomous flying surveillance robot developed

Capitalizing on our advanced image processing, image analysis, tracking, sensing and robot technologies, we developed a prototype of a small autonomous flying surveillance robot that works in tandem with our on-line security system. In the event an intrusion is detected, the robot autonomously approaches unauthorized individuals

or vehicles and shoots sharp, clear images, which it transmits to a SECOM control center.

April 2013

SECOM My Doctor Plus debuts

An emergency medical alert system for seniors, SECOM My Doctor Plus enables users to transmit emergency alerts at any time and from anywhere. In the event of a fall or sudden illness, we dispatch specially trained

emergency response personnel to the user's location. If requested by the user, who will have provided us with key information, including physicians' names and medical history, in advance, we can also transmit information to an emergency care facility.
