

Profile

SECOM CO., LTD., a pioneer in Japan’s security services industry, was established in 1962. Since then, the Company has sought to create innovative services that benefit society as a whole, in line with its mission of helping achieve a society free from concerns.

Today, SECOM, comprising the parent company and the companies of the SECOM Group, boasts an extensive business portfolio encompassing security services, fire protection services, medical services, insurance services, geospatial information services, business process outsourcing and information and communications technology (BPO and ICT) services, and other services. By creating services and systems that deliver safety and peace of mind, as well as make life more comfortable and convenient, SECOM is striving to realize its Social System Industry vision, which describes a framework of distinctive, integrated services and systems essential to society.

With the increasing complexity of social imperatives, contributing factors are expected to become ever-more intertwined and interconnected. Against this backdrop, in May 2026 SECOM formulated the SECOM Group’s Vision for 2040. Guided by this vision, the Company is advancing its fusion of people and technologies by integrating various data, enabling it to keep abreast of social change and reinforce the *ANSHIN* Platform*, as well as facilitating the development of proactive services and the continuous improvement of corporate value.

SECOM has also expanded into 18 countries and territories outside Japan. Currently, Group companies extend distinctive SECOM services—including security services, fire protection services, medical services, geospatial information services, and BPO and ICT services—customized to reflect local needs and sensibilities. Going forward, SECOM will continue to broaden global awareness of the SECOM brand.

* *ANSHIN* is Japanese for “peace of mind.” The *ANSHIN* Platform is a service infrastructure designed to provide seamless peace of mind to people in their everyday lives, as well as to society as a whole.

Corporate Philosophy

SECOM's Philosophy

SECOM's Philosophy, the driving force behind all we do, has been passed down through generations of employees since our establishment, serving as our code of conduct. This philosophy emphasizes a refusal to be content with the status quo and a commitment to doing what is appropriate. The first element expresses our determination to provide innovative services and systems by challenging accepted norms, while the second means judging the legitimacy of our actions solely by examining whether they are just, fair and beneficial not only to SECOM but also to society as a whole. We have published SECOM’s Philosophy in the form of a handbook, which has been translated into the languages of countries and territories where we have operations and distributed to employees in Japan and overseas. We continue to capitalize on training and other opportunities to share the philosophy and advance its implementation.
