SECOM offers a wide range of security systems and products that help provide peace of mind in today's rapidly changing society.

The Company's centralized and localized systems meet the security-related needs of homes, businesses and public institutions. Centralized on-line systems initiate immediate response by highly trained professionals, while self-contained proprietary security and building management systems facilitate on-site automated monitoring.

SECOM and its subsidiaries manufacture key components and research, develop, install and maintain all systems to ensure that customers receive consistent, high-quality services. The accompanying diagram outlines SECOM's comprehensive products and top-notch services, which are backed by the resources and skills of the entire SECOM Group.
